Thisshon Robert

thisshonrobert0205@gmail.com — GitHub — LinkedIn — Portfolio — Chennai, India — 63806 52637

Professional Summary

Innovative and detail-oriented **Full-Stack Developer** with experience in designing, developing, and deploying scalable web applications. Skilled in **Next.js, Node.js, PostgreSQL, Docker, and Kubernetes**. Passionate about **AI-driven automation** and building secure, high-performance systems. Strong foundation in software engineering principles and cloud-native development. Seeking to contribute to forward-thinking global teams, especially in Japan.

Education

R.M.K Engineering College *Nov 2020 – Jun 2024*
Bachelor of Engineering in **Electronics and Communication Engineering**
GPA: 8.51 / 10.0

St. Ann's Matriculation Higher Secondary School *Mar 2020*
Percentage: 69.5%

Technical Skills

Languages: Java, JavaScript, TypeScript, SQL
Frontend: React.js, Next.js, Tailwind CSS, Shadcn UI
Backend: bun.js,Node.js, Express.js, Prisma ORM, RESTful APIs, Grpc, JWT, Google Authentication
Databases: PostgreSQL, MongoDB, Redis (Pub/Sub, Queues), SQL, Prisma ORM
Cloud & DevOps: Docker, AWS (EC2,S3, Cloudfront,ASGs), Azure Cloud(learning), Kubernetes , CI/CD, Nginx
Monitoring & Messaging: Kafka, Prometheus, Grafana, WebSockets
AI & Automation: MCP Agents, HuggingFace, Gemini CLI
Version Control: Git, GitHub, Turborepo, Monorepos

Experience

Application Engineer Trainee (Internship) — Newgen Software *Jan 2024 – Jun 2024 — Chennai, India*

- Gained hands-on experience in **Web Development** using Java and JavaScript.
- Trained on enterprise products like **Omnidocs, Omniscan, and iBPS**.

Application Engineer — Newgen Software (Client: Philippines National Bank) *Jul 2024 – Jun 2025 — Chennai, India*

- Worked on **workflow digitization** using Newgen's BPM platform (iBPS).
- Customized loan form flows using **JavaScript**, configured Omnidocs, Omniscan, and BRMS for automation.
- Enhanced document management and process efficiency across multiple business units.
- **Technologies:** Java, JavaScript, SQL, BPM, BRMS

Projects

VPay — Full Stack Peer-to-Peer Wallet/Payment System
Next.js, Express.js, Prisma, PostgreSQL, AWS EC2, Docker, CI/CD, turborepo
Developed a scalable wallet/Payment platform supporting **on-ramp transactions**, **P2P transfers**. Implemented a secure webhook microservice for bank callbacks and integrated **CI/CD pipelines on AWS EC2**, the entire application is built in **Monorepo (Turborepo)** .
Future Upgrades: Kafka-based SMS and email notifications, Kubernetes orchestration, automated scaling.

GitHub: github.com/Thisshonrobert/VPay
Live: vpay.starzc.com

Ace.thetics — AI-Powered Affiliate Marketing Platform with Virtual Try-On
Google Analytics, Next.js, React.js, ImageKit IO, Postgres, Prisma ORM, RapidApi AI Integration , Prometheus/Grafana
Built an **AI-driven** fashion web application enabling users to visualize celebrity outfits through **virtual try-on** technology. Integrated affiliate links for e-Commerce monetization and real-time content updates. **ImageKit IO** was used for image size and rendering optimization. Also Integrated **Prometheus and Grafana for monitoring** and scaling. authentication using **OAuth (Google)**
Future Upgrades: Use **AI Agent** to auto-post updates on social media when new celebrity outfits are added.
GitHub: github.com/Thisshonrobert/Ace.thetics
Live: acethetics.starzc.com

XChange — Real-Time Trading Platform
Next.js, TypeScript, Redis Queues, WebSockets, PostgreSQL TimeSeries Db
Not a basic CRUD application, it is designed as a **high performance trading system** with live order book updates and atomic trade matching using multiple **Redis PubSub/Queues**, **Multiple backends**, **Engine** for executing mathematical trading matches and a **time series Postgres Db** for trade charts and **Websockets** for live data.
Future Upgrades: Scale backend using Node.js cluster for multi-core optimization, IOC(Immediate or Cancel) feature.
GitHub: github.com/Thisshonrobert/Xchangebase

Mini Project: Scalable Real-Time Chat Service (Backend)
bun.js, TypeScript, WebSockets, Redis
Built a scalable real-time group chat backend using **WebSockets** for persistent connections and **Redis Pub/Sub** for cross-instance message broadcasting. Designed dynamic group subscriptions and efficient message delivery, exploring distributed system design and **server-side state management**.
Future Upgrades: Add PostgreSQL (via Prisma) for message persistence and build a React/Next.js frontend client.
GitHub: github.com/Thisshonrobert/scalable-chatapp-backend

Courses

Special Course — 100xDevs Cohort 2.0 *Dec 2023 – Present*
Comprehensive full-stack engineering program covering **React, Node.js, Express, MongoDB, PostgreSQL, Docker, Prisma, and CI/CD pipelines**. Built production-ready applications and gained practical exposure to **AI and automation** concepts.

Certifications

- Q3 NAT – Equivalent to JLPT N3 (October 2025)
- Ethics in Engineering Practice - NPTEL (November 2023)
- Business English – Infosys Springboard (2022)
- Web Development – Internshala (2021)

Security Contribution

Edwisely OTP Vulnerability — Ethical Disclosure *Aug 2024*

- Identified a critical OTP brute-force vulnerability in Edwisely's authentication flow.
- Responsibly disclosed the issue and received official acknowledgment.
- View Acknowledgment Letter
